SECTION 3

Page 143

Section 3. Rename to **COURSE REQUIREMENTS**

Add

1. Use Care in Setting Up Course. Management, when setting courses, should keep in mind that the idea is not to trap a horse, or eliminate it by making an obstacle too difficult. The pattern should be straightforward and inviting so as to promote successful completion by all competitors from varying stages of training or experience. All courses and obstacles are to be constructed with safety in mind as to eliminate accidents. If difficult courses

are set, novice/green/limit trail should be less difficult. When the distances and spaces are measured between elements, the inside base to inside base measurement of each element, considering the normal path of the horse, should be the measuring point. Enough space must be provided for a horse to jog [at least 30 feet (9 meters)] and lope [at least 50 feet (15 meters)] for the judges to evaluate these gaits. Obstacles not combined shall be a minimum of nine feet (2.74m) apart.

2. Disruption of Obstacles. If disrupted, the course shall be reset. In the case that an obstacle is used in combination, the obstacle cannot be reset until the contestant finishes the entire obstacle.
3. All judge(s), the steward and course designer must walk the course with exhibitors prior to the start of the trail class(es). The judge(s) **and or the steward** have the right and duty to alter the course in any manner. The judge(s) may remove or change any obstacle he/she deems unsafe or non-negotiable. If at any time a trail obstacle is deemed to be unsafe by the judge(s), it shall be repaired or removed from the course. If it cannot be repaired and horses have completed the course, the score for that obstacle shall be excluded from all previous works for that class.

(renumber and reorganize as needed)
